Welcome

eitech toy manufacturing – We love toys

For over four decades, now in the third generation of family ownership, eitech in Pfaffschwende, Thuringia has had its own production of quality toys "Made in Germany".

In this catalog you will find our own brands **eitech** (metal construction sets), **teifoc** (brick construction sets) and **anbac** (antibacterial plastic toys). Please feel free to ask us about our selection of **New Classic Toys** (wooden toys).

With us you have an internationally experienced and reliable B2B partner at your side. We would be happy to assist you with our factory and our selection for white label solutions and exclusive products as well as for the implementation of your own ideas.

Your family Hildebrandt

eitech – Metal Construction Sets

Learning by Doing!

With our metal model construction sets, we open up the whole world of mechanics to young people aged 6 and up with exciting models. Thanks to more sophisticated construction kits, the target group of adult hobby mechanics can also find an ideal hobby that challenges their creative and mechanical skills well into older age.

Hand-screwing according to the building instructions, varying models or constructing something new yourself – this easily promotes creativity and three-dimensional thinking. In addition, there is always the feeling of achievement of having built an attractive model with your own hands.

Our assortments of models offer play and leisure fun for small and large mechanics. For better structuring and orientation, we have divided our assortment into the groups „Kids - fun for ages 6 and up“, „Tech-Construction - construction sets with a technical focus for children ages 8 and up and adults“, „Multifunctional - multi-model construction sets“, „ Learning - experiment sets for school children“, „Remote & App Control - remote controllable and motor-operated metal construction sets“ and „Masterclass - detailed high-end models“.

We hope you enjoy yourself!

teifoc – Brick construction set

Brick by brick with real fired bricks and water-soluble mortar.

Whether a single-family home, fire station or windmill – the teifoc brick construction sets offer young and adult architects a real building experience.

Natural and sustainable materials: Our teifoc bricks are made of high-quality, special clay. We shape the clay in our in-house brickworks before it is fired in our firing chamber - just like the original. The special mortar mixture is harmless to health and water-soluble. If you immerse the models in water, the layers of mortar dissolve and the bricks can be rebuilt again and again.

Educationally valuable learning toy: children are given their first knowledge of building materials and craftsmanship in a playful way. While building walls, they train their hand-eye coordination, creativity, patience and fine motor skills. Building together with parents also promotes a “we” feeling, builds a creative community and strengthens social skills.

For better structuring and orientation, we have divided our assortment into the groups “Kids – fun to play from 6 years old”, “Creative building Kits – construction sets for developing your own creativity”, “Master Builders – larger model construction sets for children aged 6 and 8 years and over” and “Construction Worlds for hobbyists right up to older ages”. A corresponding assortment of accessories completes our offering.

Made in Germany

anbac

With anbac toys, in a unique (patented) and innovative material from eitech, the wish of many parents for a largely hygienic toy for their children becomes a reality. What little children grasp in their fingers they are also likely to take in their mouth or lick, together with bacteria and germs. anbac toys constantly reduce germs and bacteria that collect on the surface during play.

Saliva-proof, bite-proof and already germ-free within 8 hours!

This antibacterial toy innovation is manufactured from unique, patented mix of materials with antibacterial pine heartwood and high-grade plastics. The saliva-proof and bite-proof are already up to 100% germ free after eight hours – on other plastics, bacteria last almost 24 hours.

The innovative combination of wood and plastic permits the combination of a rapid, natural antibacterial effect, a pleasant, woody smell and safety during play.

- Natural antibacterial effect
- Sustainably and responsibly manufactured
- Germ-free within 8 hours
- Made in Germany

General conditions

General Conditions Germany (AGB) to be used in commercial dealings (seller and purchaser are entrepreneurs)

1. Area of Application

1. These conditions of purchase apply exclusively to companies, juridical persons organised in accordance with public law or special public law funds within the meaning of § 310 paragraph 1 BGB. We shall only recognise conflicting provisions or conditions of the orderer that vary from our conditions of purchase if we have expressly manifested our approval of the applicability of such conditions in writing.
2. These conditions of purchase shall also apply with regard to all future transactions with the orderer, provided these are legal transactions of a related kind.
3. Individual agreements concluded with the purchaser on an individual basis (including collateral agreements, addenda and amendments) shall take precedence over these conditions of purchase in any case. With respect to the contents of such agreements, a written agreement and/or our written confirmation shall be authoritative, unless evidence to the contrary is presented.

2. Offer and Conclusion of Contract

Where an order is to be regarded as an offer within the meaning of § 145 BGB, it shall only be considered accepted if there is no objection on our part within fourteen (14) days following receipt. Amendments and modifications shall require our confirmation as a general rule. Our offers are non-binding. Orders of the purchaser shall only become binding upon our written (electronic or printed) confirmation.

3. Provided documents

We reserve all rights of ownership as well as copyright to all documents provided to the orderer in connection with the placing of the order. This includes documents transmitted in electronic form, such as calculations, drawings, etc. Access to these documents must not be granted to third parties unless our express written permission has been issued to the orderer. If we do not accept the orderer's offer within the time period indicated in § 2, then these documents must be returned to us immediately.

4. Prices and Payment

1. Unless otherwise agreed in writing, our prices shall apply ex-factory, including packaging and value-added tax in the applicable amount. Where shipping is ordered in accordance with the customer's request, any additional costs shall be borne by the purchaser in the event of objection to the shipping instructions. Our prices shall be valid for one season commencing February 1 and running until February 1 of the following year. We reserve our right of recall should substantial price increases occur in the raw materials sector. Should we raise our prices during the period between conclusion of an agreement and delivery, then the purchaser shall be entitled to cancel the agreement with regard to the undelivered portion within seven (7) days of receiving notice of the increase in prices.
2. Payment of the purchase price must be made exclusively to one of the accounts indicated overleaf.
Cash discounts shall only be permitted in accordance with special written agreement.
3. If the purchaser misses the due date for payment, he or she shall be noted in default, irrespective as to whether a warning has been issued or not. If this occurs, we shall be entitled to claim default interest in the amount of 8 percent points above the basic rate. We additionally reserve the right to claim default interest at a higher rate. Where a well-founded suspicion exists with regard to the purchaser's ability to pay, in particular where the purchaser still owes outstanding payments or arrears, we shall be entitled to revoke any terms of credit that have been issued and to demand advance payments or security for future deliveries.

4. If no agreements as to fixed prices have been concluded, then we shall reserve the right to make reasonable changes in prices on account of varying wage, material and distribution costs for deliveries set to occur three (3) months or more following conclusion of the agreement.

5. Rights of Retention

The orderer shall only be entitled to exercise a right of retention if his or her counterclaim rests on identical contractual circumstances.

6. Delivery

1. Indication of an actual delivery time on our part presumes the proper and timely performance of certain obligations on the part of the orderer. We reserve the right to object on the basis of an unfulfilled agreement.
2. If the orderer defaults with respect to acceptance or otherwise commits a culpable breach of his duty to cooperate, we shall be entitled to demand compensation for those damages incurred thus far, including any additional expenses. Additional claims remain reserved. If the above conditions are present, then the risk of accidental destruction or accidental deterioration of the purchased goods shall pass to the purchaser at the time the purchaser defaults with regard to acceptance or payment for the goods.
3. Retail toy market (Germany) orders with a net value exceeding 400 Euros are shipped and delivered free. For Austria, orders with a net value exceeding 500 Euros are shipped and delivered free. Orders below these amounts are invoiced on the basis of partial shipping costs.
4. We maintain our delivery schedules with a certain amount of leeway unless our confirmation indicates otherwise. This is always conditioned upon an undisrupted manufacturing process. Force majeure releases us from any and all delivery promises and commitments. No claims for damages may be derived therefrom. We are entitled to make partial deliveries. In the event of delivery default, the purchaser shall be obliged to grant us a grace period of at least six (6) weeks.
5. Return shipments shall require the prior written permission of the seller. Return shipments shall only be accepted if they are packed in the original packaging - for exchange, replacement or for reimbursement of the purchase price. In the event of a return shipment, the purchaser shall be obliged to bear any resulting return shipping costs. Return shipments sent freight collect shall not be accepted.

7. Risk of loss where shipping

If the goods are sent to the orderer upon his request, then the risk of accidental destruction or deterioration of the goods shall pass to the orderer upon departure of the goods from the factory/warehouse, at the latest. This shall apply irrespective as to whether shipment of the goods occurs from the place of performance, and regardless as to which party bears the shipping costs.

8. Reservation of Ownership

1. We reserve the right of ownership to the goods delivered up to the time we receive full payment on the basis of the delivery agreement. This shall apply with respect to all future deliveries, even if we do not expressly invoke this right. We shall be entitled to reclaim the goods purchased if the orderer violates the terms of the agreement.
2. The orderer shall be obliged to handle the goods purchased with due care until title thereto passes to him or her. As long as title to the goods has not passed, the orderer shall be obliged to provide us with immediate notification in the event the delivered item is pledged or otherwise encumbered in favour of a third party. If the third party is unable to reimburse us for the legal as well as out-of-court expenses associated with a legal action within the meaning of § 771 ZPO, then the orderer shall bear liability with respect to any resulting shortfall.

3. The orderer shall be entitled to resell the reserved goods in the ordinary course of business. The orderer shall assign any claims against the acquirer of the reserved goods that have been resold up to the amount of the final invoice amount agreed with our company (including value-added tax). This assignment shall apply irrespective as to whether the goods purchased have been subjected to any treatment or processing following resale. The orderer shall remain entitled to collect this debt following the assignment. Our company's right to collect on this debt shall remain unaffected thereby. We shall not, however, take measures to collect this debt if the orderer fulfils his payment obligations using the proceeds of his own collection endeavours, if the orderer has not defaulted with respect to payment and no insolvency proceedings have been initiated against him or her and/or no stop-payment orders have been issued.
4. Any treatment or processing or remodelling of the goods purchased by the orderer shall be performed exclusively on behalf of and at the order of our company. In this case, the orderer's entitlement to the goods purchased shall continue to exist. If the goods purchased are treated or processed using objects or materials that do not constitute the property of our company, we shall acquire co-ownership in the new item on the basis of the proportional value of the purchased goods provided by our company to the value of the treated or processed item at the time of the treatment or processing thereof. The same shall apply in the event the goods are blended or combined. If the blending or combination occurs in such a fashion as to render the item of the orderer the principal item, then it shall be considered agreed that the orderer shall transfer partial ownership of the item to our company and safeguard sole or partial ownership thereof on our behalf. To secure the claims of our company against the orderer, the orderer shall assign, to our company, any and all claims he or she may have against third parties in connection with the combination, with real property, of the reserved item; we accept this assignment as of the present date.
5. We shall be obliged to release the securities provided to us by the orderer if the value thereof exceeds the claims to be secured by more than 20%.

9. Warranty, Defect Notification and Rights of Recourse/Rights of Recourse Against Manufacturers

1. The warranty rights of the orderer are conditioned upon the orderer's compliance with his or her obligations regarding inspection and objections to defects ascertained within the meaning of § 377 HGB.
2. Deviations in colour, changes to the article or item and/or improvements in comparison with the illustrations are reserved. Objections shall only be considered if they are received within one (1) week of receiving the goods. Any claims regarding hidden or latent defects undetected by the orderer must be raised within the legal warranty period. Return shipment of the goods shall only be permitted with our approval.
3. If, despite the exercise of due care, the delivered goods reveal defects that were already in existence at the time at which risk of loss passed, then, subject to any timely complaints concerning defects, we shall repair the goods or deliver replacement goods. We shall be accorded a reasonable amount of time to cure defects. Recourse claims shall remain unaffected by the foregoing provision, and indeed without restriction.
4. If the attempted cure measures fail, then the orderer shall be entitled to withdraw from the agreement or reduce the compensation. Damage compensation claims shall be excluded.
5. No claims for defects shall exist on account of minor deviations from the agreed quality, minor impairments in usability, natural wear and tear or damages incurred subsequent to the passing of risk of loss on account of faulty or negligent handling, excessive strain, unsuitable operating equipment or due to external influences not contemplated by the agreement. If improper maintenance or repair work or modifications are undertaken, then no claims for defects shall exist on account of the effects resulting therefrom.
6. Claims of the orderer on account of expenses required to effect cure measures, in particular transport, road, labour and material costs, shall be excluded to the extent the goods delivered by our company are subsequently moved to a location other than the business premises of the orderer, unless the displacement of the goods is required for their proper use.

7. Rights of recourse of the orderer against our company shall only exist as far as the orderer has not concluded any agreements with his or her acquirer that go beyond those claims for defects regarded as mandatory in accordance with law. With respect to the scope of the recourse action against the supplier, paragraph 6 shall apply accordingly.

10. Miscellaneous

1. This agreement, as well as all legal relations of the parties, shall be governed in accordance with the law of the Federal Republic of Germany under exclusion of the UN Sales Law (CISG - Convention on the International Sale of Goods).
2. The place of execution and exclusive jurisdiction with regard to any and all disputes arising on the basis of this agreement shall be the registered office of our company, unless otherwise indicated in the order confirmation.
