## HAMA bead painting ...

... hours of fun and learning through play.

HAMA is the perfect, user-friendly system. It helps develop a child's creativity while playing. Nothing is fixed until the child is satisfied with it. With a few HAMA pegboards and a variety of colourful HAMA Beads, the imagination can run riot!

HAMA is a carefully structured learning programme, of which the different elements come into prominence at various stages of the child's development. It has been designed to accompany the child from the earliest, fumbling attempts to control fingers, right through to adulthood, when "bead painting" becomes a self-expressive hobby, rather than a learning tool. Moreover, it has been designed in such a way that children never suspect they are doing anything but playing. Young children need to train their eyes and their hands. They must learn to recognize and match colours, to pick up and place small objects with precision, to distinguish shapes from their surrounding fields!

The most popular way of playing with HAMA Beads is to make your design and afterwards make it permanent through ironing – please see page 74. Common to all HAMA products is, what we show on our packaging is actually inside the box. You will always have more than enough beads to make sure, that the illustrated designs can actually be made from the contents of the box. "What you see is what you get" – applies to all HAMA products. In order to provide even more exciting play possibilities, we have in addition to our regularly shaped pegboards developed a number of specially shaped pegboards: you can choose from wild animals, horse, dog, cat, teddybear, etc. etc. and we are constantly coming up with new designs.

There are so many packs to choose from, that you can buy as much or as little HAMA as you need. Inexpensive replacement beads are sold separately, and you can choose the exact pack for your next project. When the beads are ironed, the pegboards are reusable again and again.

**mini**

2.5 mm Ø – our smallest size, intended for children from 10 years.

**midi**

5 mm Ø – from 5 years.  
Reuse the pegboards again and again.  
Remember to let grown-ups do the ironing!

**maxi**

10 mm Ø – from 3 years.  
The ideal size for younger children who cannot yet handle the smaller MIDI size. Remember to let grown-ups do the ironing.

**MAXI STICK**

From 3 years. Aimed at younger children to develop motor skills. Use the sticks/pegs again and again.

-------	----

In the index on page 87 the page numbers with new items are marked in bold.

The HAMA MIDI Beads with a diameter of 5 mm are the most popular within the HAMA range, and are perfect for all age groups. We recommend from 5 years, as children at this age have control of their own motor skills. Children and adults can have great fun with the tiny plastic beads, whether they string them or iron them. They are completely safe should they be swallowed, and through the nature of the raw materials (PE) no harm will come to the child.

## 3071

### Giant open gift box

Contents: Approx. 7.200 beads,  
2 pegboards: Fantasy horse No. 315  
and medium hexagonal No. 329.

**399-10**

It has often been said, that a child learns more in the early years than in the whole of the rest of its life. Certainly it is true, that they learn all the basic and most important skills in the early years.  
In order to help in this very important process, we at HAMA have developed and issued a number of Inspiration booklets, and we will constantly come up with new ideas and new designs, helping children to get started and hopefully enabling them to develop their own designs and ideas!

**399-10, 399-11, 399-12, 399-15, 399-16**

Colour 48

Example when ordering: (Small heart – red colour) No. 236-05.

The HAMA MAXI size (10 mm Ø) has been developed for younger children, who require a bigger size bead for their small fingers. Motor skills have not yet been developed for the MIDI size, meaning that MAXI is an obvious system for the younger children in playgroups, nurseries and preschool classes. The majority of items offered in the MAXI series have translucent pegboards for placing patterns underneath. The target group for our MAXI series is normally children from 3-5 years. To make this series simpler, we do not offer as many colours as in our MIDI series.

Master pack: 20 bags

The HAMA MINI system is based on our smallest beads: 2.5 mm Ø. This size is intended for children from 10 years, and you will have to use tweezers for this system. Many adults work with this size bead instead of cross-stitch or needlework.

Because of the size of the beads you will be able to make very detailed and sophisticated designs and patterns, and only lack of imagination will stop you. To help you get started we refer you to our Inspiration booklets 13 and 15. For colour references please see page 27 in this catalogue. Only one mix available with 59 colours: Article No. 583 (bag of approx. 7.500 beads) and article No. 501-00 (bag of approx. 2.000 beads).

HAMA MAXI STICK is our latest development in our line of educational and motor training products for younger children. After careful study and consideration this series was introduced, and we will certainly develop it further in our efforts to come up with a complete series of entertaining and skill building products for younger children.

The pegs have been designed in such a way that it is very easy for little children to handle them: easy to mount and easy to take off again because of the special design. They are always easy to remove, as illustrated below.

Please also note the very high quality and fine execution of the pinboard, almost impossible to break, and made with many supports underneath to make it easy to play with for even very young children.

Colours available:

As with the MAXI series we offer less colours than in our MINI and MIDI series, simply to avoid confusion for the age group.

Please also note that we supply the sticks in assorted colours only: white, yellow, red, blue, green, black, neon green, neon orange and pink.

The products on pages 68-73 are those products we recommend for schools and institutions. Both the Maxi and Midi pegboards are packed in a range of themes, such as transport and animals. We have also packed Midi beads in bags of 1.000 beads in several themed ranges, such as holidays, action and princesses, to make it easier to shop for large groups.

Within our ironing system you will find a large variety of different pegboards: square, heart shape, star shape, etc., and we are constantly adding new pegboards with specific themes, such as wild animals, dog, cat, teddybear, etc.

If you follow the illustrations below, you will enjoy the adventurous "world of HAMA Beads," and we can promise you many hours of fun and educational play. With our variety of pegboards you will be able to find just the design, you would like to use. Otherwise create your own designs by using our regular pegboards, which can also be linked together for making even larger designs!

1. Place beads, one by one, on a pegboard to create a pattern. You may use a pattern from one of our Inspiration booklets, or you may use your own imagination to create your own.

2. Place the ironing paper on top of your design. Use a household iron to fuse/melt the beads together to create a permanent design. Apply the iron to the ironing paper for just a few seconds using smooth, circular movements. Never hold the iron completely still. After having applied the iron for a short period, the colour of the beads will suddenly be more clearly visible through the ironing paper; this means that the ironing is finished. Do not overheat the beads. Make sure that you never touch the pegboard with a hot iron as this will damage the pegs. By avoiding this you can use the pegboards again and again. Once ironed, the beads cannot be used again.

**Important: ironing must be done by an adult because of the high temperature.**

The function of our special ironing paper is to protect the iron from getting plastic deposits on it. When using the HAMA ironing paper, we can guarantee a perfect result.

3. After a few minutes to cool off, you remove the design from the pegboard.

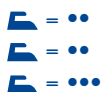

You will get the best result, if you press it under e.g. a book until it is completely cooled off.

HAMA Beads are available in three sizes and we recommend that they are ironed at the following temperatures:

MINI Beads: Set the iron to the wool setting.

MIDI Beads: Set the iron to the cotton setting.

MAXI Beads: Set the iron to the linen setting.

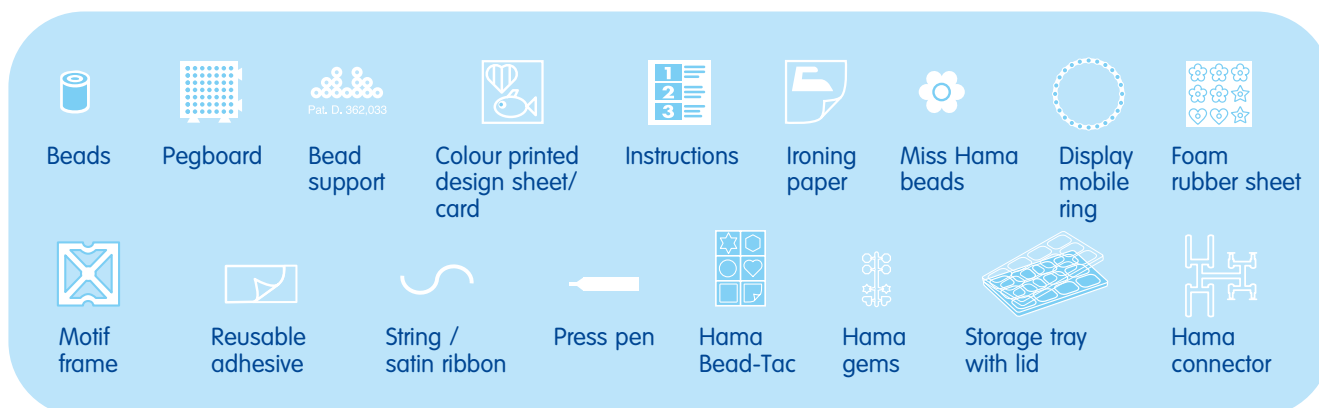

The exact temperature may vary from iron to iron. Therefore it is a good idea first to make a test ironing of a small bead design before you iron your larger designs.

## Have fun with your HAMA Beads!

You will have many wonderful hours with HAMA. Fantasy is the only limit to your designs!

If you have Internet access, come visit our homepage: [www.hama.dk](http://www.hama.dk)

## The basic concept of Malte Haaning Plastic A/S

Malte Haaning Plastic A/S should primarily develop, manufacture and offer plastic toys as well as plastic craft products for children from 3 years and over.

The product must be of high quality, produce good play value and an educational content, which appeals to the child's creative sense and helps it to develop motor skills and hand-eye co-ordination. At the same time, the products must provide satisfying and enjoyable play.

Malte Haaning Plastic A/S was founded in 1961, when Malte Haaning started production of drinking straws.

HAMA Beads were first introduced to the Danish market in 1971, and today we export to more than 50 countries worldwide.

HAMA as a brand name was established in 1984.

**Made in Denmark**
